

What Can The Digital Missions Display Do?

1. **Displaying missionary updates:** The Digital Missions Display provides a platform for churches to share updates, prayer letters, images, and videos from their missionaries in one central location that can be easily accessed by church members.
2. **Customization:** The display can be customized to match the church's branding and individual missionary needs, making it a flexible tool that can adapt to the specific requirements of each church and mission.
3. **Interactivity:** The display system includes a touchscreen and accompanying app that allows visitors and members to interact with the system and learn about the missionaries, view their updates, and engage with them through QR code support.
4. **Communication:** The QR codes also allow visitors and members to communicate directly with the missionaries through the system, creating opportunities for deeper engagement and connection.
5. **Tracking:** The Digital Missions Display enables churches to track and monitor the progress of their missionaries and the impact of their support, providing a way to measure the effectiveness of their missions program.
6. **Support for missions education:** The system can be used as a tool to educate church members and visitors about the various mission fields and opportunities for involvement, increasing awareness and support for global missions.
7. **Efficiency and effectiveness:** The Digital Missions Display provides a centralized system for managing and distributing information, which can help churches be more efficient and effective in their support of missionaries.
8. **Transparency and accountability:** By providing regular updates and direct communication channels, the system increases transparency and accountability in missions work.
9. **Unity and engagement:** By keeping missions at the forefront of church members' minds and encouraging interaction and engagement with the missionaries, the Digital Missions Display creates unity among believers and supports deeper engagement with the global community.

Overall, the Digital Missions Display is a versatile tool that can help churches connect with their missionaries and engage their congregations around missions work, all while increasing transparency, efficiency, and effectiveness in their missions programs.
