

The Lord gave the word: great was the company of those that published it. Psalms 68:11

March/April 2024

For thou hast magnified thy word above all thy name. Psalms 138:2

Dear Friends and Supporters,

Two very disturbing reports have been circulating throughout the Christian community in China. There has been an ongoing project since 2019 by the Chinese Communist Party (CCP) to rewrite the Bible in its own image. Their version of the Bible will be a more communist-friendly version. It will include select altered passages from the real Bible, while also including Confucian and Buddhist principles, as well as sayings from President Xi Jinping. This is one of Satan's most valuable tools – twisting the Word of God into a lie!

The newest Chinese tactic is that Chinese officials are testing out a new App, demanding citizens to pre-register before attending religious services. This spring, in Henan Province, the CCP rolled out an App to get approval to go to any kind of religious service. You have to pre-register in order to go to a religious gathering, give the Chinese government all your information, where you live, your ID information, and so forth.

Chinese citizens may get approval to attend the gathering once they've gone through this process – and it's only available for churches registered with the CCP; house churches and other unsanctioned gatherings aren't permitted under any circumstances. If the authorities come into a church service, they simply ask everyone to take out their phone and open the App. **“Did you get approval?”** Obviously, the App will be used to track down Christians and shut down religious gatherings. It's easy to see how this App will work, since the government used a very similar App-based control during COVID. The Chinese people had to register on the COVID App to travel or enter certain buildings.

This why it is so important that we continue our distribution efforts both inside China and to Chinese here in America.

Ministry Partners: We recently visited each of these wonderful ministries to pick up Chinese print material.
